Barco's visualization portfolio for Corporate AV

BARCO

Visibly yours

A different view on **smart**

Barco has been a pioneer and innovator in projection systems for more than 25 years. Our models have been consistently lauded for both their image quality and their reliability, and we have long been a household name in companies around the world.

Simplifying enterprise visualization

Our new portfolio aims to reinvent enterprise visualization, creating a new visual experience for businesses around the globe. We have used all of our expertise and experience to create a groundbreaking new line of products for the Corporate AV market.

Our products still excel in image quality and reliability, but now there is an added focus on design, collaboration, and ease of use. This is visible not only in our new line of projectors, but also in our additional innovative visualization tools.

collaboration

Unequaled image quality

Successful presentations depend on many factors, and one of them is showing content in unsurpassed image quality. That's why our projectors offer crystal-clear images of superior caliber — the result of our many years of experience.

Stylish design

Because a creative environment triggers creativity, we paid special attention to the design of our new products. The Barco portfolio for Corporate AV is elegant and stylish, and because every product easily blends in with the environment, they can seamlessly be integrated into your modern office space.

Designed to last

Barco projectors have a reputation for working day in, day out, all the time — a habit we didn't break with our new series. Our portfolio's robustness is second to none, ensuring you smooth, continued operation for many years.

OUR SIX-SIDED STORY

Future-proof performance

As a global leader in projection technology, we are committed to offering you the most innovative and comprehensive range of products available. What's more, we've designed our projectors for enterprise to be easily upgradable and expandable for future additions and new features.

A product for every need

In meeting rooms, one projector size just doesn't fit all. That's why our portfolio comprises a wide range of different projectors, varying in brightness, size, and aspect ratio.

Ultimate ease of use

In meetings, people want to focus on the presentation, not on the technology. Ease of use was at the head of our requirements list while designing our enterprise portfolio.

Projection for every enterprise visualization need

With an elaborate portfolio of Corporate AV projectors, Barco has exactly the right projector for your enterprise environment. Whatever the size, purpose, or demands of the room, our new product range will exceed even your highest expectations.

Our projection portfolio for the Corporate AV market consists of three series, each with its own focus and features:

- The biggest family of the three, the **Present** range of one-chip DLP projectors, contains smartly designed projectors offering brightness levels between 5,000 and 10,000 lumens.
- Thanks to the large pixel space of our **Collaborate** projectors, multiple participants can simultaneously present their content on-screen in excellent image quality, for true teamwork.
- Powered by three-chip DLP technology, the **Impress** projector offers the pinnacle of image quality and brightness for large-screen projection in your meeting room.

Presenting the **Present** range

Offering a large number of smartly designed projectors, the Present range of one-chip DLP models is the most elaborate of Barco's projector families for Corporate AV. With brightness levels ranging between 5,000 and 10,000 ANSI lumens, the Present range contains the perfect projection solution for a multitude of environments, including boardrooms, meeting rooms, auditoria, training rooms, and houses of worship. These high-quality projectors excel in detail, contrast, and color management, and their sleek white design allows them to blend into every modern enterprise environment.

The total cost of ownership for our Present projectors has been reduced to a minimum thanks to their reliable DLP technology and sealed optics. What's more, the Present range is fully future proof and has been designed to be easily upgradable with extra connectivity modules.

5,000 lumens

PFWX-51B

- 4,750 ANSI lumens
- WXGA 1,280 x 800

PFWU-51B

- 4,650 ANSI lumens
- WUXGA 1,920 x 1,200

6,000 lumens

PGXG-61B

- 6,750 ANSI lumens
- XGA 1,024 x 768

PGWX-61B

- 6,200 ANSI lumens
- WXGA 1,280 x 800

PGWU-61B

- 5,900 ANSI lumens
- WUXGA 1,920 x 1,200

8,000 lumens

PHXG-91B

- 8,500 ANSI lumens
- XGA 1,024 x 768

PHWX-81B

- 7,300 ANSI lumens
- WXGA 1,280 x 800

PHWU-81B

- 7,500 ANSI lumens
- WUXGA 1,920 x 1,200

10,000 lumens

PJWU-101B

- 10,000 lumens
- WUXGA 1,920 x 1,200

Collaborate with confidence

Collaboration is the key to business success. That's why Barco's Collaborate range is designed to offer the ideal canvas for optimal teamwork. Featuring resolutions up to WQXGA resolution and a wide aspect ratio, the Collaborate projectors can display a wide variety of content in perfect image quality. This immaculate image quality ensures that every detail is clearly visible.

The series' sleek design perfectly complements the office space the projector is installed in. Furthermore, thanks to the projectors' low noise level, working in an environment with front projection has never been more comfortable.

Three models to choose from

CNWU-61B

- 6,000 ANSI lumens
- WUXGA 1,920 x 1,200

CRPN-52B

- 5,000 ANSI lumens
- Panorama 2,560 x 1,080

CRWQ-62B

- 5,500 ANSI lumens
- WQXGA 2,560 x 1,600

Built to Impress

MSWU-81E

- 8,300 ANSI lumens
- WUXGA 1,920 x 1,200

Powered by three-chip DLP technology, the Impress projector generates the highest quality images possible, rich in contrast and with perfect color saturation and stability. Featuring outstanding brightness levels, the Impress is perfectly suited for large-screen projection in big meeting rooms and auditoria.

ClickShare

Enhanced efficiency and collaboration for meeting rooms

In meeting rooms, Barco has traditionally been synonymous with reliable, high-brightness projection. And though this is still an important part of what we offer, we are extending our portfolio with a number of innovative products to enhance the visualization and collaboration experience in meeting rooms.

ClickShare, Barco's easy-to-use meeting room presentation and collaboration system, allows users to share their laptop content via the meeting room AV system, by simply plugging in and clicking a button. What's more, tablets and smartphones can also share their content via ClickShare, through the free ClickShare app for Android and iOS.

Three easy steps

1. Connect

Plug in the ClickShare Button and start the application

2. Click

Click to show your laptop screen on the large meeting room display

3. Share

Share your content with other meeting participants

Button

Connect the Button to the USB port on your PC or Mac, click it, and share!

1-to-4 screen display

Up to four meeting participants can share their content simultaneously.

No installation

ClickShare is a zero footprint application, leaving no software on the user's PC or Mac.

Mobile

iPad, iPhone, and Android users can share using the ClickShare app.

Wireless

No cables, no fuss. With ClickShare, you can finally say goodbye to that clumsy video cable.

Video and audio

Play video at up to 30 fps, with perfectly synchronized audio

A perfect match

ClickShare with panoramic impression

Our Corporate AV portfolio is designed to work perfectly together, enabling efficient collaboration of your teams. As an example, let's couple two of our most innovative Barco products – the CRPN-52B panoramic projector and ClickShare. This setup enables a remarkable collaborate experience, giving a detailed view of complex data sets.

The ClickShare composition has been optimized for the panoramic canvas, displaying all user screens in a side-by-side manner. Unlike fixed installations with multiple projectors or displays, this Panoramic canvas can transform to accommodate one, two, three and even four participants sharing visual content simultaneously with just one click of a button.

Advantages

Easy to use, install, and maintain

ClickShare handles the on screen resolution and composition automatically. With one projector instead of two, infrastructure, planning, and setup complexity is greatly reduced.

More productive meetings

Combine larger screen size with easy access to the central display. Users can spontaneously participate with just one click of a button. Content of the composition is handled automatically to respect data integrity and create the best use of screen real estate.

Flexible

Optimize the use of the panoramic pixel space by automatically adapting the composition of participant inputs onto the panoramic canvas. This is done respecting the aspect ratio and content detail.

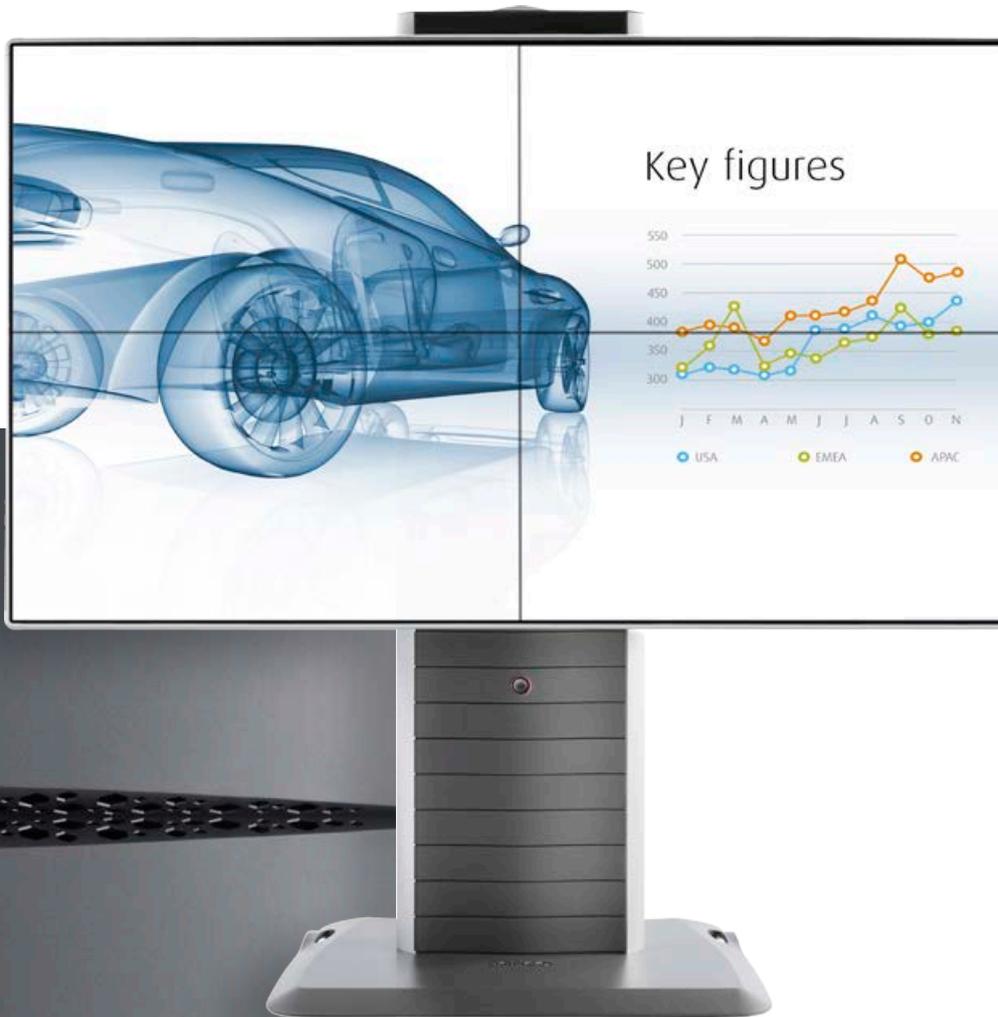

The **OBLX series** of freestanding structures

Large LCD video walls are an attractive alternative to projection in higher-end meeting rooms and boardrooms. However, not all meeting rooms are capable of hosting such an installation, either because the wall cannot support it, its shape doesn't fit, or you're not allowed to change anything.

A freestanding OBLX structure allows you to position a video wall wherever you want, without the need for any wall support. This makes it possible to install a video wall in any room.

The OBLX-55 structure is capable of holding four 55" near-seamless LCD panels in a 2x2 landscape mode setup.

This means you have a 4K Ultra HD resolution canvas at your disposal, giving you the opportunity to display your content in extreme detail. Alternatively, a 3x1 setup in portrait mode (the OBPX-55) is possible as well. By using any desired number of extension kits, the horizontal expansion of the LCD video wall is virtually unlimited.

Making visual collaboration truly simple

By providing state-of-the-art technology that simplifies visual collaboration, Barco will change the way you work. Across from a wide portfolio of one-chip and three-chip DLP projectors, Barco has also designed the world's most revolutionary meeting room product, ClickShare, an easy-to-use presentation tool that will get your content on-screen in a single click. And thanks to the freestanding structures, you can easily integrate LCD video walls into your workplace as well.
