**General Information**

The Relay Module is a dual, plug-in mechanical relay assembly for use in the Unison Dimming Series rack enclosures. Each Relay Module provides two electrically held relays, in the same form factor as standard dimmer modules. This enables designers to mix and match dimmer and relays for control of diverse loads. Ideal for control of non-dimmable load types such as HID lamps.

**Applications**
- Designed for use in Unison 240V Unison DRd rack enclosures
- High Intensity Discharge ballasts (Metal Halide and High Pressure Sodium)
- Non-dimmed On/Off loads
- Motors
- Power for fans and standard outlets
- Moving lights, fog machines and other powered effects

**Features**
- Level-activated mechanical relays
- Two circuits per module
- High-density modular assembly
- Die-cast aluminum chassis
- Fully magnetic circuit breakers

**General**
- 65,000A Short Circuit Current Rating (SCCR)
- UL and cUL LISTED

These values should be provided to a qualified HVAC design engineer, along with dimmer quantities, types and dimmer room dimensions, to calculate dimmer room air handling requirements.

Dimmer room HVAC systems must at all times maintain the specified ambient temperature at the dimmer rack. Dimming systems operating within 10°F of the upper or lower temperature limits must strictly follow installation and operation guidelines to operate reliably.
